Professor P. A. Munz,
Pomona College,
Claremont, Cal.

Dear Prof. Munz:

Dr. H. M. Hall has just told me that you have secured the Jones Herbarium and I congratulate you, as well as California botanists generally.

I am writing at this time because of my plan to transfer part of our Crepis work to Riverside for the coming year. Mr. Collins & I will both be at Riverside growing extensive cultures of Crepis for our taxonomic and genetic studies. I am doing the taxonomic work in connection with this project and am anxious to learn more about our American species. It occurs to me that among the Jones material there are doubtless some Crepis sheets and I am wondering whether it would be possible for you to have these gotten in shape (over

so I can use them next year. If they
could be mounted so much the better
but if not I would be glad to have easy
access to them. Probably you have some
Crepis material in your present herbarium
and if any of that is at present unmounted
or inaccessible I would greatly appreciate
it if you could have it gotten into shape
for study.

Hoping this is not asking too much
and that I shall have an opportunity to
get acquainted with you next year, I am

Sincerely yours,

E. B. Babcock

P.S. I ~~enclose~~^{send} reprint of my paper
explaining general nature of our work.
